Introduction

DIRIDZA Projects CC is a Zimbabwean based Company missioned on Developing Irrigation Robust Infrastructural Dynamics in Zimbabwe and Abroad with a water and other natural resources conservation mandate. We are an irrigation and water industry proven company providing cost effective service to both National and International markets. DIRIDZA Projects is known for quick and effective results no matter the scale and location of project(s).

The company was formed to address the negative impacts of climatic change (little or no rainfall) in the most cost-effective way, thus, enhancing farmer support year-round. With combined experience spanning over thirty (30) years in this industry, our knowledge, professionalism, and workmanship quality, we always ensure timeous and within budget service delivery.

Our Team

Our team has a mandate of hands-on-approach and with simple ideals on service delivery excellence with a combined vigorous experience, dealing with the worst African terrains and conditions. Our team is highly qualified, committed, and vibrant in delivering excellent services. We strive to maintain our forefront-edge approach by continually training new insights and knowledge, thus, utilising the latest advanced technology available. The company follows an internal proactive development and empowerment program.

The company's communication is enhanced at all levels ensuring commitment and transparency with all employees. Dignity and respect are the treatment we give to our employees. We always aim at developing a fully skilled workforce through on-going skills and development training especially to the disadvantaged individuals. We are committed to equity in the employment across the company in accordance with the Employment Equity Act.

Vision

DIRIDZA PROJECTS is strongly dedicated to address its clients' needs and produce unmatched and exceptional personalised and industrial service with respect to our diverse areas of expertise. Our dedication is to deliver the best quality workforce with excellence towards a reputation over-riding our vision.

Mission

DIRIDZA PROJECTS is a company missioned on Developing Irrigation Robust Infrastructural Dynamics in Zimbabwe and Abroad with a water and other natural resources conservation mandate. We strive for professional, reliable, and effective on-time and within budget service delivery, keeping focused on the client(s) through flawless service. Our business is built on referrals through meeting and exceeding our contractual obligations.

Our business values include skills development and social responsibility therefore creating a meaningful investment in the social and community responsibilities by involving local communities with projects. That's our way of ensuring uplifting of local community and development of sustaining skills.

We always aim to strengthen relationships with the communities within the surrounding areas in which we operate and to assist our local communities with provision of efficient & effective irrigation and water systems.

Strategy

DIRIDZA PROJECTS has tight relationships as well as association with the leading irrigation and water equipment manufacturers in Zimbabwe and abroad, giving us an opportunity to offer our customers a wide range of selection to the highest quality products available and access to the latest technology. Our experience in the industry has taught us that customer service is of paramount importance and well-supervised, well-completed job is the best way of putting the company's name on the first page within the market.

We will continue to build and maintain our promise to provide integrated solutions combining product & service excellence, complete technical expertise, and full customer service. We are dedicated to ensuring trust and confidence within our customers and end-users in dealing with us.

Services

It's our mandate to ensure the service(s) we provide is delivered to our client's total satisfaction.
